Job Description

I am a fully qualified Consultant Orthopaedic and Trauma surgeon, working in the Liverpool and University hospitals and I have been heavily involved in Complex Trauma and Limb Reconstruction surgery since April 2004.

Since my qualification as Orthopaedic Surgeon and prior to my Consultant appointment I underwent two training fellowships in Trauma and Limb Reconstruction. I have also undertaken International visiting surgeon programs in a Level 1 trauma center in the USA and in 2 specialist centres in Germany.

Limb Reconstruction is a subspecialty in Orthopaedics which focuses in dealing with conditions such as complex limb trauma, complications of trauma, congenital and developmental deformities, infection.

Conditions of Special Interest:

- Open fractures including limb threatening injuries
- High energy limb trauma including patients with multiple injuries
- Complex articular fractures
- Post-traumatic complications
- Non unions (fractures that fail to heal)
- Malunions (fractures that healed causing deformity)
- Bone infection and implant related infections
- Joint contractures

Within that context of my Limb Reconstruction NHS practice, I regularly receive acute and elective tertiary referrals from hospitals in Merseyside, Lancashire, Greater Manchester, Cumbria, the Isle of Man, North Wales.

The Liverpool Limb Reconstruction service has a worldwide reputation in the field and receives regularly visiting surgeons from around the globe who wish to enhance their knowledge in the field.

Memberships of Professional Bodies

British Orthopaedic Association
Orthopaedic Trauma Society
British Limb Reconstruction Society
British Medical Association

Orthopaedic Trauma Association (U.S.A.)
American Academy of Orthopaedic Surgeons (U.S.A.)
Royal College of Surgeons of Glasgow

Further Information and Roles

Executive Committee Member of the [British Limb Reconstruction Society](#) which is the Society that oversees the role and practice of our subspecialty in the U.K.

Honorary Lecturer University of Liverpool

Organiser and Chair of the Audit meetings of the [Mersey Orthoplastic Group](#) which is a group of Orthopaedic and Plastic surgeons delivering treatment for complex open injuries and bone infection in the Merseyside region.

Publications: Several peer- reviewed articles in Trauma and Limb Reconstruction. A full list of other publications, presentations, and dissertations appears in the comprehensive CV (22 pages), which can be provided on request.

Journal reviewer: I am involved as a reviewer and I am part of the editorial board of peer reviewed journals in the field of Orthopaedic Trauma and Limb Reconstruction.

Teaching: I contribute regularly as faculty in International Trauma conferences and courses in complex trauma and Limb reconstruction. I chair courses in the UK and overseas teaching on management of limb threatening injuries that attract International delegates in Orthopaedic trauma and plastic surgery. I overview the [Liverpool Limb Reconstruction Fellowship](#).

Medico-legal Experience

I have received formal training in the preparation of medico legal reporting and have been providing medical reports since 2006, during this time, I have also acquired previous court experience.

I receive instructions on Personal Injury claims, large part of which relate to complex and serious injuries.

As a result of my clinical practice dealing regularly with complications of trauma, I am very comfortable providing opinion on medical negligence cases relating to trauma management and its sequelae.

I have been assisting in complex cases involving litigation within my employers' framework in the NHS.
